

Incident Report: Loss and Theft of Mobile Wi-Fi Device

Report Date: September 22, 2023

Reported by: Ronaldo Springer

Incident Date: September 20, 2023

Location: Vryheid's Lust Bus Park

Device: Mobile Wi-Fi Device

Incident Type: Loss and Theft

Description of the Incident:

On Wednesday, September 20, 2023, I had the mobile Wi-Fi device charging on my bed in my residence. Regrettably, I unintentionally left it behind when I left for work that day. This oversight was entirely my responsibility, and I deeply regret not ensuring the device was with me when I left my residence. Later in the day, my sister-in-law, Mesha Kissoon, without my knowledge or permission, picked up the Wi-Fi device and took it with her to her workplace.

Unfortunately, on her way home from work, at approximately 10:00 PM, she was a victim of a robbery by an unknown individual around Vryheid's Lust Bus Park in Georgetown. During the incident, the perpetrator forcibly took her bag, which contained not only personal belongings but also the mobile Wi-Fi device. She reported the robbery to the Brickdam Police Station immediately, but as of the time of this report, the stolen items, including the Wi-Fi device, have not been recovered.

The loss and subsequent theft of the mobile Wi-Fi device were unfortunate and resulted from a combination of personal oversight and an unfortunate criminal act. I deeply regret this incident and will work diligently to prevent similar occurrences in the future. I remain committed to ensuring the security of company property and will learn from this incident to exercise greater care and diligence in the future.
